Final Project Documentation

1. My website does use the required 5 tags in html, see index.html
2. My sections have consistent design, and use common pages such as header, sidebar and footer
3. The sidebar, header, and footer which are implemented on every page can be edited in one place. See sidemenu.html, footer.html, and header.html
4. There are publicly accessible pages, and a page that is not accessible unless logged in, character's page is not accessible unless logged in
5. The login Id is test and the Password is pass. See database.sql
6. My website utilizes php for the login, see login.php
7. My website utilizes POST for the login, see login.php
8. There is a poll on the side menu that utilizes polls
9. If the wrong password/username is supplied it provides and incorrect login message
10. Both the characters page and locations page utilize multiple photos
11. The about page has an embedded youtube video
12. The poll has a function in index.html which uses javascript
13. Jquery is used on every page to load header.html, footer.html, and sidemenu.html
14. Bootstrap is used in header.html to create a button that sends you to login
15. In index the same javascript for the poll utilizes ajax
16. My website delivers functionality of show casing a tv show from a fan's perspective, while displaying info about the show
17. This is the Documentation
18. Here is a link to the page
